Chuck Wunder, Fire Chief

In light of the continued concerns surrounding the COVID-19 (Corona Virus) and our sincere desire to protect our staff and volunteers, the Green Valley Fire District will be implementing the following changes to our service effective March 16, 2020.

- We are suspending all Fire Corps related activities and services until further notice. These programs included the smoke alarm and battery replacement programs, the lock box install program and home evaluations in partnership with Green Valley Assistance Services.
- We are screening all persons coming to our fire stations to have their blood pressure checked.
- We have postponed all of our community outreach presentations and station tours.
- We are cancelling all off our public CPR and First Aid classes held at the Green Valley training center and Anamax Park.

We are hopeful that Green Valley Fire District will be able to re-institute these programs and services soon and appreciate everyone's understanding as we navigate this new territory in our history. Green Valley Fire believes that we must do our part in minimizing the danger of community spread of the Corona Virus. These programs will start up again as soon as we feel confident it is safe to do so. We are taking all the steps to protect the community we take pride in serving.
